

DIRECT FED MICROBIAL

Benefits of Ganpro

- Supports and maintains a healthy gut flora
- Improves feed intake and feed efficiency
- Increases breast weight and body and carcass weight
- Increases lactic acid bacteria and total cultivable anaerobe flora
- Outperforms two other Bacillus subtilis DFM's

■ Control ■ Ganpro ■ BMD ■ BS1 ■ BS2

Ganpro contains a source of live (viable), naturally occurring microorganisms

Ganpro is easy to use

- No special storage or refrigeration required
- Can be pelleted (survives pelleting up to 94%)
- Remains viable when added to premixes and will not react with other ingredients
- Ideal for antibiotic-free diets

Guaranteed Analysis

Calcium: Minimum - 27% / Maximum - 27.5%

Bacillus coagulans: Minimum 55 million CFU*/gram

* Colony forming units

Ingredients

Calcium carbonate, Bacillus coagulans

Recommended For

Turkeys, broilers, layers and all other poultry

Mixing and Feeding Directions

For poultry of all ages, mix into feed to provide 1 gram/hd/day. Consult animal health professional for specific feeding recommendations.

Packaging

50 lb bag

Accepted for use as a Direct Fed Microbial by U.S. F.D.A. Center for Veterinary Medicine
