

DIRECT FED MICROBIAL

Benefits of Ganpro

- Improves feed conversion and weight gain
- Reduces gut pathogens by establishing intestinal bacterial balance
- Establishes and maintains a healthy digestive tract
- Outperforms two other Bacillus subtilis DFMs
- Improves net return per pig

■ Control ■ Ganpro ■ BS1 ■ BS2

Ganpro contains a source of live (viable), naturally occurring microorganisms

Ganpro is easy to use

- No special storage or refrigeration required
- Can be pelleted (survives pelleting up to 94%)
- Remains viable when added to premixes/supplements and will not react with other ingredients

Guaranteed Analysis

Calcium: Minimum - 27% / Maximum - 27.5%
Bacillus coagulans: Minimum 55 million CFU*/gram
 * Colony forming units

Ingredients

Calcium carbonate, Bacillus coagulans

Recommended For

Sow, Grow-Finish Pigs and Nursery Piglets

Mixing and Feeding Directions

Mix into feed to provide 5.5g/hd/day.
 Consult animal health professional for specific feeding recommendations.

Packaging

50 lb bag

Accepted for use as a Direct Fed Microbial by U.S. F.D.A. Center for Veterinary Medicine
